

IMAGE TheatreMax

FIXED SCREENS

IMAGE TheatreMax has some big advantages for home cinema:

Easy Installation

Each IMAGE TheatreMax fixed screen is supplied in kit form, with concealed keyhole type hanging brackets – so it can be easily installed by almost anyone.

Flatness

Tensioned during the simple assembly process, the projection surface stays perfectly flat – giving you an excellent screen image.

High Contrast Surface

TheatreMax screens are available in a special High Contrast Grey projection surface, improving contrast and colour (with a very slight reduction in brightness). All sizes also in Matt White.

Black Velvet Frame

TheatreMax is framed in black velvet for a great looking home cinema screen – even when it's not in use.
