

DIAMOND 10 STYLE AV HOME CINEMA SYSTEM

Wharfedale

DIAMOND 10 STYLE AV HOME CINEMA SYSTEM

Following the success of the Diamond 10 Series, Wharfedale unveils its most modern add-on to the series' extensive line-up of speakers, the Diamond 10 Style AV Cinema System. Designed specifically for the discerning audio enthusiast, for the system features a 3-Channel LCR column speaker capable of producing superb sound when used for either gaming or watching movies, regardless of its svelte size.

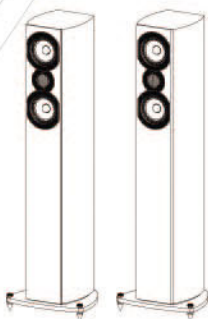

The Diamond 10 Style AV Cinema System bears many of the same enhancements as its regular-sized siblings, but with new combinations of 100mm Kevlar bass drivers and 25mm silk dome tweeters affixed inside the LCR column and the mini tower speakers. The LCR column speaker requires little power even when combined with the mini tower or surround satellite speakers. And on top of that, it elegantly accents your flat panel HDTV.

Diamond 10 Style AV Cinema System can be setup as a 5.1ch or a 3.1ch system. In a 3.1ch setup, you only need to install the LCR column speaker, whereas in a 5.1ch setup, two additional rear speakers may be attached to the entire system. Adding the optional active subwoofer further intensifies the sound performance of the entire AV system, giving you a thrilling home cinema experience every time.
